*Structural Engineer:* Simon Design Engineering, LLC  
*Contractor:*          Walsh Brothers, Inc.  
*Erector:*              James F. Stearns Company, Inc.

This twenty story addition provided additional parking, treatment and research space for this world-renown cancer institute and was a high-profile project for ISSI at the famed Yawkey Center. Our ironworkers captured national attention and endeared themselves to onlookers, as they spray-painted the names of young cancer patients on the steel as the beams were hoisted.

ISSI demonstrated its true team approach on this project by working with its customer to successfully deal with project delays and re-designs.
