Mashantucket, CT

*ISSI job number:* 95-69  
*Project type:* Hotel, casino, central plant  
*Tons of steel:* 16,000  
*Owner/developer:* Foxwoods Resort  
*Structural Engineer:* BVH Engineers  
*Contractor:* C.R. Klewin  
*Erector:* Daniel Koury Construction, Inc.

Erected over a two and a half year period, Phase 6B of the Foxwoods Resort is a testament to the ability of ISSI to fabricate and erect large, complex, fast-track projects. With 1.4 million sf and housing 800 luxury hotel rooms, restaurants, and high-limit gaming rooms, the 21 story Grand Pequot Hotel contains a variety of structural steel elements – from jumbo column sections and massive plate girders to large trusses spanning over 100 feet. Three 300 ton tower cranes were used to erect the structure. 316 distinct shipping sequences were required for the project.
