

Isaacson Structural Steel, Inc.

PROJECT PROFILE

North Shore Medical Center ACC and MOB
Danvers, MA

ISSI job number 2-565
Project type: Medical/Healthcare
Tons of steel: 1066
Owner: Partners HealthCare Systems, Inc.
Architect: Shepley Bulfinch Richardson & Abbott
Structural Engineer: McNamara/Salvia
Contractor: Walsh Brothers Incorporated
Erector: James F. Stearns Company Inc.

Consisting of a 122,000-square-foot outpatient facility and an 80,000 sf medical office building, the NSMC project showcased ISSI's attention to detail. An undulating building line required components that were specially rolled and fabricated to achieve the design intent and perfectly match with the two story glass atrium. The galvanized canopy steel was also curved to match the building.

Detailing and fabrication took place during the summer of 2007. Erection of the structure was essentially completed in the spring of 2008.
